

App Compliance Screener

Visual Demo Walkthrough

Paste any app URL -> instant scrape + policy classification -> verdict

<https://app-compliance-screener-tihxaacrkagcy2ijutdvsk.streamlit.app>

Step 1 - Open the App

Open the screener in your browser. You see the title, URL input box, Deep scrape toggle (on by default), and the Screen button.

Deploy 

App Compliance Screener

Paste any app URL → instant scrape + policy classification → verdict. All results saved to findings table.

App URL(s) — one per line

```
https://my-app.base44.app
https://another-
app base44 app
```

☒ Deep scrape (Playwright) 

 Screen

Findings Table

☐ Detailed view 

Step 2 - Enter a URL

Paste a URL into the text box (e.g. <https://imperialcasino.base44.app>). You can enter multiple URLs, one per line.

Deploy 

App Compliance Screener

Paste any app URL → instant scrape + policy classification → verdict. All results saved to findings table.

App URL(s) — one per line

[https://imperialcasino.base44.a
pp](https://imperialcasino.base44.app)

☒ Deep scrape (Playwright) 

 Screen

Findings Table

☐ Detailed view 

All screened apps — persistent across sessions. Sort, filter, review.

201

Step 3 - View the Verdict

After clicking Screen, the verdict appears: app name, URL, Not Supportable / Restricted / Likely Supportable badge, confidence score, and matched policy category with details.

Deploy 

Latest screening — 1 app(s)

Imperial Casino

<https://imperialcasino.base44.app> • 8.3s •

ID: 697dc67abbb768c5bbbab5d5

Not Supportable

Conf: 100%

▼ Policy matches (1)

 **[WP] Illegal gambling services & Legal gambling or Game of Skill where participants receive cash or cash equivalents or prizes with/of material value: including but not limited to: Casinos, poker, bingo, slot machines, betting, lotteries, racing, fantasy sports. Any type of US based gambling services → Gambling and Games of Skill ›**

Step 4 - Findings Table and KPIs

Scroll down to the Findings Table. The KPI bar shows totals: 391 Total Screened, 14 Not Supportable, etc. The table lists all screened apps with columns for URL, Name, Verdict, Confidence, and Review Status.

Deploy 

casino, poker, blackjack Signals:
GAMB-001 Reg: UIGEA; state
gambling laws; BRAM; GBPP

> Signals & metadata
