

Unauthorized Use of Intellectual Property and Counterfeit Goods

Guidance

Our Restricted Businesses list prohibits the use of our services for any business that directly infringes or facilitates the infringement of different forms of intellectual property ("IP"), such as trademarks or copyrights.

Why is it risky for us to support businesses that may infringe the IP rights of others?

Processing for an infringing business poses at least three types of risks for Stripe. The first is legal: IP owners could attempt to hold us "contributorily" liable if one of our users is offering infringing products or services. The second is a partnership (and monetary) risk: processing for infringing products and services is against card network rules, and could result in card brand violations. And the third is macro/systemic: trademarks can support our mission of increasing the GDP of the internet by enabling consumers to trust that the products and services they purchase online (including from Stripe users) are genuine, fully functional, and safe (which is especially true for products like pharmaceuticals, auto/machine parts, household items, etc. where the potential danger from a faulty or deficient counterfeit item could be significant).

Subcategory 1: Users primarily focused on selling counterfeits

These are users that are primarily focused on the sale of counterfeit physical goods that imitate, replicate or invite confusion with a legitimate product. Based on the indicators described below, it is less likely that they will be able to provide Stripe with evidence that the goods they sell are authorized or not counterfeit OR that they will be able to continue their commercial activity after removing violating items.

What are counterfeit physical goods?

- Physical goods described as replica, knock-off, imitation, clone, faux, fake, mirror image, or similar terms when referring to a brand name.
- Physical goods that mimic, replicate or imitate branded products in an attempt to create confusion and to pass them off as genuine products. The examples below are not exhaustive:
 - Handbags, wallets, designer clothing, sneakers or watches of luxury brands. Common examples include fake Nike Jordan sneakers, Balenciaga hoodies, Rolex watches or Coach wallets.
 - Counterfeit Apple products like airpods or iphones using Apple branding explicitly or referring to in description.

Additional Indicators:

Strong indicators that goods sold are counterfeit goods (these are only indicators. Their presence alone does not automatically imply user is violation this policy)

- Goods are described as replica, knock-off, imitation, clone, faux, fake, mirror image, or similar terms when referring to a brand name
- Goods sold for lower than usual price (price discounted by more than 65% compared to top results in an internet search)
- Goods presented via bad quality/low resolution product photos/videos
- Goods accompanied by a very limited product description

- Sold on a website without features like terms and conditions, privacy policy, refund policy, no “about” section, no “contact” section
- Sold on website with broken features like broken links
- Sold along completely unrelated product categories (shoes listed together with household appliances or kitchen equipment)
- Sold on website that redirects its visitors to spammy/clickbait/porn sites upon interacting with the website

How to determine if a user is likely focused on selling counterfeit physical goods?

- Descriptions of the website or the store explicitly call out that it specializes on replicas, knock offs, imitations, clones, faux, fakes, mirror images of known brands. OR
- At least 50% of all items/merchandise sold are suspected counterfeits or at least 10 products (if there are too many to count to determine the 50%).

What are not counterfeit physical goods?

- Vintage, secondhand, and consignment goods
- Resellers of in-demand, limited edition items like sneakerbots & other resellers of “hypebeast” items (e.g. seller of limited edition of Nike shoes that does not demonstrate any of the signals above, seller of limited release Supreme products etc.)
- Users offering repairs, refreshment or personalisation
- Sellers of refurbished products (e.g refurbished iPhones or AirPods)
- New and legitimate goods

Commonly counterfeited brands and products (List is not exhaustive): Chanel, Nike, Gucci, Rolex, Prada, Louis Vuitton, Burberry, Cartier, Coach, Dior, Hermes, Tiffany, Yeezy, Armani, Yves Saint Laurent (YSL), Bulgari, Celine, Chloe, Fendi, Givenchy, Balenciaga, Goyard

Subcategory 2: Users not focusing on sale of counterfeits

These are users that are not primarily focused on the sale of counterfeit physical goods that imitate, replicate or invite confusion with a legitimate product. Based on the indicators described below, it is likely that they will be able to provide Stripe with evidence that the goods they sell are in fact not counterfeit OR that they will be able to continue their commercial activity after removing the small number of violating items they offer.

What are counterfeit physical goods?

- Physical goods described as replica, knock-off, imitation, clone, faux, fake, mirror image, or similar terms when referring to a brand name.
- Physical goods that mimic, replicate or imitate branded products in an attempt to create confusion and to pass them off as genuine products. The examples below are not exhaustive:
 - Handbags, wallets, designer clothing, sneakers or watches of luxury brands. Common examples include fake Nike Jordan sneakers, Balenciaga hoodies, Rolex watches or Coach wallets.
 - Counterfeit Apple products like airpods or iphones using apple branding explicitly or referring to in description.

Additional Indicators

Strong indicators that goods sold are counterfeit goods (these are only indicators. Their presence alone does not automatically imply user is violation this policy)

- Goods are described as replica, knock-off, imitation, clone, faux, fake, mirror image, or similar terms when referring to a brand name
- Goods sold for lower than usual price (price discounted by more than 65% compared to top results in an internet search)
- Goods presented via bad quality/low resolution product photos/videos
- Goods accompanied by a very limited product description
- Sold on a website with missing features like terms and conditions, refund policy, no “about” section, no “contact” section
- Sold on website with broken features like broken links
- Sold along completely unrelated product categories (shoes listed together with household appliances or kitchen equipment)

How to determine that is user is likely not focused on selling counterfeit physical goods:

- Descriptions of the website or the store does not call out that it specializes on replicas, knock offs, imitations, clones, faux, fakes, mirror images of known brands. AND
- Less than 50% of all items/merchandise sold are suspected counterfeits or less than 10 items /merchandise (if there are too many to count to determine the 50%).

What are not counterfeit physical goods?

- Vintage, secondhand, and consignment goods
- Resellers of in-demand, limited edition items like sneakerbots & other resellers of “hypebeast” items (e.g. seller of limited edition Nike shoes that does not demonstrate any of the signals above, seller of limited release Supreme products etc.)
- Users offering repairs, refreshment or personalisation
- Sellers of refurbished products (e.g refurbished iPhones or AirPods)
- New and legitimate goods

Subcategory 3: Physical products intended for circumvention of rights-protection mechanisms (RPMs)

These physical products, generally electronic devices of various complexity OR altered versions of the original devices, allow its user to access content (movies, music, software, games etc.) while bypassing the controls put in place by the rights holders and manufacturers.

This subcategory is not intended to prohibit or otherwise restrict sale of general-purpose devices /equipment. User is not supportable if:

- Streaming devices sold are loaded with software that facilitates unauthorized access to content like movies, TV shows, sports broadcasts or music. Typically, such devices are called IPTVs /Android TVs. Such streaming devices have to be marketed as such (e.g by explicit description or through visual cues.)
- RCM loaders sold are primarily designed or produced (or marketed) for the purpose of circumventing a technological measure that controls access to copyrighted work. For example, they are marketed as a way to bypass Nintendo Switch copyright protections.
- Jailbroken or “loaded” devices sold allow their users to stream or otherwise access content without accessing it from the source that would be controlled by the rights holders. Usually, such devices, after the purchase, allow access to the copyrighted content for free.
- Game emulators sold are preloaded with copyright-protected games. Commonly, this would be Nintendo, SEGA or PlayStation/Sony games. We can assume games are copyright-protected unless they are marketed to be as “abandon-ware” or as “not copyright protected”. Sale of digital game emulators without preloaded copyright-protected content is supportable.

Mod chips sold are primarily designed or produced (or marketed) for the purpose of circumventing a technological measure that controls access to copyrighted work.

Note: This subcategory does not include SAAS platforms offering web hosting services such as cloud storage, or any other online service that includes housing or maintaining files for websites

Subcategory 4: Merchants Offering Unauthorized Access to Copyrighted Content

These are merchants that offer services that facilitate unauthorized access to copyrighted content like movies, tv shows, paid tv channels, paid sports channels, software, music, literature etc.

- User is not supportable if:
 - The digital products & services sold are marketed “bootlegged”, “pirated” or “cracked” copyrighted content AND/OR
 - The digital products & services sold are compatible only with “jailbroken” devices as declared by the user on their website AND/OR
 - The digital products & services sold are an artificial Intelligence model primarily intended to be used to produce copyright infringing content AND/OR
 - IPTV subscription/service is sold that provides access to copyrighted content and at least 2 of the following signals are present:
 - Broad range of international or "expat" channels with no regional specification (e.g German IPTV offering US sports channels)
 - Offering mainstream movies within 90-days of theater release
 - Pay-per-view content (e.g UFC) as part of the subscription service
 - Access to premium channels (e.g., HBO) on a flat-fee structure as part of the package Large (100+) channel inventory for a low (less than 10 USD/EUR) monthly fee
- User facilitating sale of 3rd party software and the following is true
 - The software keys are sold as standalone products and not as an addition to hardware
 - Price is discounted at 65% or more
 - The user does not sell games/game keys/game codes only (PC, Xbox, PS4, Nintendo Switch etc)
 - There is at least 1 of these signals observed:
 - Installation of the software requires steps that are not typical for installation of
 - Such a product. e.g customer has to call the seller, message the seller on Whatsapp for instructions, install additional software etc.
 - Sold on a website with missing features like terms and conditions, privacy
 - Policy, no “about” section, no “contact” section
 - Sold on website with broken features like broken links
 - Sold on websites with hidden or visible redirect links to spam & clickbait or porn.

Important note:

- Steam keys and other activation keys for computer games do not require an authorisation. If users sell game store credit (PlayStation Store credits, Steam Store credits) please apply the Stored Value policy.
- Digital video game mods that allow users to customize levels or game experience and do not facilitate copyright circumvention are considered supportable.
- This policy also does not restrict subscription-sharing services.

Subcategory 5: IPTV users and users offering access to course materials, textbooks and study guides

These are users that offer digital products and services enabling access to a 3rd party copyrighted content like movies, tv shows, paid tv channels, paid sports channels, software, music, literature etc. and there is a likelihood they are authorized to do so. Currently, we offer explicit guidance only for users offering IPTV services & subscriptions and users offering access to course materials. Stripe has to verify such users are authorized, otherwise they are not supportable.

To confirm a user is authorized, the user in question has to provide Stripe with the appropriate documentation.

- IPTV subscription/services without bad signals:
 - If a user offers IPTV subscription/services and does not have bad signals referred to in Subcategory 4, they can be treated as likely authorized. Such users have to either share documentation confirming they are authorized content distributors OR that the content they offer is not copyrighted.
 - They have to share such documentation for at least 3 items from their catalog (e.g., HBO, Showtime, premium channels, newly released movies, live sports)
 - After a merchant replies to the initial contact CR, please, follow the steps outlined here.
 - Users offering their own content only and/or user generated content only do not have to offer any authorization and are supportable.
- Access to course materials, textbooks, study guides
 - If user facilitates sale of or access to 3rd party online course materials, textbooks, study guides etc they have to share documentation confirming they are authorized content distributors if:
 - The user is not an educational institution (e.g. College, school, university) AND
 - Aims at retail customers (e.g aimed directly at students) AND
 - Goods sold for lower than usual price (price discounted by 65% or more)

Subcategory 6: Cyberlockers and similar remote digital file-sharing services where uploaded content is accessible to the public or the service pays uploaders for content.

(High-Risk - Not enabled for Wix)

A Cyberlocker is a remote digital file sharing service that stores uploaded content from users. Cyberlocker merchants are also known as file-hosting services, cloud-based storage services and online file-storage. Risks associated with Cyberlockers include that they can be used to facilitate sharing of illicit or illegal content. Cyberlockers hosting this type of content shall be actioned under the appropriate category. For content that infringes IP rights see Unauthorized use of Intellectual Property and Counterfeit Goods, for prohibited violence see Violent Extremism, and for pornographic material see Adult Content or Child Exploitation.

Both of the following must be true for all users in this subcategory :

- The user offers a product or service that allows digital files to be uploaded and downloaded
- The core business offering is file distribution and sharing

AND

The user must offer one of the following:

- Affiliate/Rewards Programs: Customers that upload content are financially rewarded by the Stripe user. This includes download credits and payments for uploads.

- Public Accessibility of Uploaded Files: Files uploaded to the website are made available to the public via search engines, other third-party sites, or on-site search functions that allows one to search through all uploaded content. This does not include peer-to-peer file sharing where one must have the link to access the file.

Subcategory 7: Unauthorized merchandise

These are users that are selling physical goods that use someone else's logos, characters, designs, or other products of the creative economy and are not authorized to do so. For the purposes of making this policy applicable at scale, we recognize 3 main types of unauthorized merchandise:

- User selling clothes, bags, toys, accessories or other physical merchandise with logos, characters and designs from movies, TV, graphic novels, games or other forms of entertainment that are not fan art (not transformation enough) and that are not sold on an official website or official reseller website
 - Examples of physical goods that are not transformative enough:
 - Unauthorized t-shirts with print of Marvel's avenger logo, that is not altered in any way.
 - Halloween costumes of Batman
 - Unauthorized Lamp shade with a Disney princess
 - Unauthorized phone case and other print/make on-demand products with Star Wars character as depicted in a movie
 - Toys using unauthorized branding. (E.g. toys using unauthorized Paw Patrol branding)
- Users selling clothes, bags, toys, accessories or other physical merchandise with logos or branding of companies that are known to primarily produce other goods and that are not fan art and that are not sold through an official website or official reseller website.
 - Examples of branded goods produced/licensed by companies that are known to primarily produce other goods would be an AUDI t-shirt or Budweiser backpack.
 - Examples of brands that are often a target of such activity include but are not limited to: AAA, Adobe, Apple, Audi, BMW, Budweiser, Chevron, Coca-Cola, H&M, Harley Davidson, Honda, Intuit, L'Oreal, McDonalds, Mercedes-Benz, Microsoft, Pepsi, Porsche, Red Bull, Samsung, Starbucks, Tory Burch, Toyota,
- User selling sports jerseys and hats using sports teams and leagues logos associated with professional sports leagues and that are not sold through an official website or official reseller website
 - Users that sell collectable sports memorabilia, second hand or vintage goods only are exclude
 - Example of such leagues include but are not limited to:, Major League Baseball (MLB), Major League Soccer (MLS), National Basketball Association (NBA), National Football League (NFL), National Hockey League (NHL), Champions League , Premier League , LaLiga, Bundesliga, Serie A

What is not unauthorized merchandise:

- Goods that are trying to pass off as genuine or nearly identical in appearance. Such goods would be considered counterfeit and treated under Subcategory 1.
- Goods that use unauthorized IP in combination with counterfeit goods (e.g Nike sneakers using NBA logos). In such cases, consider whether a user violates Subcategory 1.
- Users that sell collectable sports memorabilia, second hand or vintage goods only are excluded
- Original, unique "fan art". Users selling "fan art" are supportable. In order to determine whether the goods are fan art, use following indicators:

- It will either be in the description of the listing or the website or it is evident from their presentation through context cues.
- Volume can also be a highly relevant signal for fan art. Fan art will tend to be bespoke and one-off (or at least limited/low in number). While there is no magic number here, in general if a merchant is selling more than 250 items/goods using well-known characters, that is more likely to be unauthorized merchandise than fan art.
- Fan art is more likely to use the logos, characters and designs in a transformative way so that the physical goods are unique and cannot be mistaken for official versions offered by the copyright owner. Examples include, but are not limited to:
 - Picture of a World of Warcraft character drawn by pencil
 - Stormtrooper sculpted as a medieval warrior
 - Mug with cartoon version of a k-pop band that is not an imitation of official Merchandise
 - Mug with a movie quote or music lyrics
 - Animated characters in an absurd, satirical or completely foreign setting that is
 - Different from the movies, TV, graphic novels, entertainment or games
- Cases where there are clear indicators that the user is offering official merchandise. Strong signals include:
 - Website links to official social media presence of the brand, entertainment company, movie franchise, TV show, musician etc or to other related websites that are an official online presence.
 - Website has the authenticity verification section.
 - In the case of sports jerseys and hats, website links to official social media presence of the team, league or an official distributor and other related websites that are an official presence of the league or a sports team.
 - In the case of sports jerseys and hats, website is associated with a known brick-and mortar chain like Walmart, Target, JD Sports, Decathlon etc. Use internet search to validate this.

What are the indicators that the user is selling goods that are not authorized:

- There are spelling errors, variations of a logo that differs from the authorized standard. Please be aware that some brands have limited editions that might be altering the logo, e.g a pride flag.
- Goods are presented via bad quality/low resolution product photos/videos
- The volume of goods sold is too high to plausibly qualify as fan art (again, anything over 250 is highly unlikely to be fan art).

For prompting:

Key Problematic Cases Related to IP Infringement

- **Luxury items** such as jewelry and accessories

- **Apparel** such as shoes and clothing
- **Electronics** including mobile phones, smartwatches, and other gadgets
- **Digital goods**, including IPTV
- **Photos** of celebrities or movie scenes
- **Fabrics or patterns** displaying famous logos
- **Unauthorized licensed materials / copyright-protected content**, such as painted copies of celebrity photos
- **Unauthorized trademark-protected goods** (e.g., Nike)
- **Goods re-crafted from second-hand items** using branded elements
- **Double-branded merchandise and accessories**
- **Crafted jewelry** made from branded decorations (e.g., buttons) where logos or trademarks are still used
- **Resale of replica items**
- **Toys and game cards**
- **Characters and derivatives** from IPs such as Disney, Star Wars, Pokémon, etc.
- **IP-protected electronics** (e.g., Apple, Nvidia, Samsung)
- **Repair services** that require authorization (e.g., Apple, Samsung)
- **Charms** displaying famous logos
- Beauty products and perfumes
- Jerseys (football/soccer)

Counterfeit Product Categories: Overview	
Category	Examples of Counterfeits
Luxury Watches and jewelry	Rolex, Omega, Patek Philippe replicas, Cartier, Hublot, Audemars Piguet
Designer Handbags	Louis Vuitton, Gucci, Chanel, Prada, YSL, Telfar, Michael Kors
Apparel & Accessories	Fake leggings, caps, bags, belts, sunglasses, shoes (Nike, Adidas, Supreme, Off-White)
Footwear & Sportswear	Nike, Adidas, Puma, Reebok shoes; fake jerseys, shorts, training gear, YEEZY, Nike Air Jordan, Converse, Vans, Timberland

Luxury Goods	Louis Vuitton, Gucci, Balenciaga, Maison Margiela, Stone Island, Dior
Smartphones & Accessories	iPhones, Samsung, Dyson Airwrap, devices, fake earphones, chargers, batteries
Gaming Consoles & Software	PlayStation, Xbox, Nintendo consoles, pirated games/software
Laptop Components	Fake SSDs, RAM, power banks
Automotive Parts & Tires	Brake pads, airbags, spark plugs (Toyota, BMW, Honda), counterfeit tires
Beauty & Personal Care	MAC, Huda Beauty, Chanel, Dior; Foreo, Charlotte Tilbury, Olaplex, Too Faced, Urban Decay, La Mer - fake lipsticks, mascaras, perfumes, sunscreens
Software & Digital Content	Windows OS, Adobe Photoshop, Microsoft Office, pirated games and movies
Crafts, Art, and Patterns	Cannot sell: Copies of purchased or library patterns/art. Derivative works without licensing (e.g., products based on copyrighted photos, artworks, or movie scenes). Finished products from a copyrighted pattern unless permission is granted. Photos of celebrities/movie scenes cannot be used in craft patterns or merchandise without: Copyright/licensing rights. Model release (for identifiable persons). "Fan art" is typically not legal for sale unless permitted.

Brands Most Frequently Counterfeited Online

Brand	Industry/Category	Primary Counterfeit Products	Notable Characteristics
Louis Vuitton	Luxury (Fashion)	Handbags, wallets, belts, apparel	High brand prestige, iconic monograms, frequently copied items
Gucci	Luxury (Fashion)	Handbags, clothing, accessories, shoes	Standout logos and patterns, wide range of products
Chanel	Luxury (Fashion/Beauty)	Handbags, apparel, perfumes, cosmetic products	Global luxury brand icon, demand for signature bags and fragrances
Nike	Sportswear/Footwear	Sneakers, athletic apparel	Ever-popular sneaker lines (Air Jordan, etc.)
Rolex	Luxury (Watches)	Watches	High resale value, global symbol of luxury
Apple	Technology	iPhones, chargers, accessories, AirPods	High demand for devices and accessories, global tech leader

Comprehensive IP Violation Reference Table

Brand / Franchise	Characters / Products	IP Type
Barbie	Barbie, Ken, Dreamhouse, Barbie Logo	Trademark + Copyright

Hot Wheels	Hot Wheels cars, logos, playsets	Trademark + Copyright
Hello Kitty	Hello Kitty, My Melody, Kuromi, Sanrio characters	Trademark + Copyright
Peppa Pig	Peppa, George, Daddy Pig, Mummy Pig	Trademark + Copyright
Bluey	Bluey, Bingo, Bandit, Chilli	Trademark + Copyright
Cocomelon	JJ, logo, characters from videos	Trademark + Copyright
Baby Shark	Pinkfong, Baby Shark characters	Trademark + Copyright
L.O.L. Surprise	LOL dolls, Tots, Pets, OMG dolls	Trademark + Copyright
Thomas the Tank Engine	Thomas, Percy, Gordon, logo	Trademark + Copyright
Disney	Frozen, Moana, Elsa, Anna, Olaf, Ariel, Belle, Cinderella, etc.	Trademark + Copyright
Pixar	Toy Story, Cars (Lightning McQueen), Monsters Inc, etc.	Trademark + Copyright
Star Wars	Yoda, Baby Yoda/Grogu, Darth Vader, lightsaber, Mandalorian	Trademark + Copyright
Marvel	Avengers, Iron Man, Spider-Man, Hulk, Captain America, Black Panther	Trademark + Copyright
DC Comics	Batman, Superman, Wonder Woman, Joker, Flash	Trademark + Copyright
Harry Potter	Hogwarts, Gryffindor, Harry, Hermione, Ron, Dobby, Hedwig	Trademark + Copyright

Paw Patrol	Chase, Marshall, Skye, Rubble, Ryder, Paw Patrol logo	Trademark + Copyright
DreamWorks	Shrek, How to Train Your Dragon, Toothless, Trolls	Trademark + Copyright
SpongeBob	SpongeBob, Patrick, Squidward	Trademark + Copyright
Rick and Morty	Rick, Morty, portal gun	Trademark + Copyright
LEGO	Minifigures, LEGO sets, LEGO logo	Trademark + Copyright
Nintendo	Mario, Luigi, Princess Peach, Yoshi, Zelda, Link, Pokémon, Pikachu, Eevee, Charizard	Trademark + Copyright
Minecraft	Steve, Creeper, Enderman, Minecraft textures	Trademark + Copyright
Fortnite	Skins, logos, emotes, characters	Trademark + Copyright
Roblox	Roblox logo, characters, game assets	Trademark + Copyright
Among Us	Crewmates, impostors, logo	Trademark + Copyright
Call of Duty	Characters, weapons, game logos	Trademark + Copyright
Animal Crossing	Isabelle, Tom Nook, villagers	Trademark + Copyright
Sonic the Hedgehog	Sonic, Tails, Knuckles, logo	Trademark + Copyright
Gucci	GG pattern, logo, product likeness	Trademark
Louis Vuitton	Monogram pattern, LV logo	Trademark
Chanel	CC logo, Chanel No.5, product images	Trademark

Dior	Dior logo, product likeness	Trademark
YSL	YSL logo	Trademark
Nike	Swoosh, Just Do It, Air Jordan	Trademark
Adidas	Three stripes, trefoil, logo	Trademark
Puma	Puma logo	Trademark
Supreme	Box logo, red/white design	Trademark
Off-White	Diagonal stripes, quotation mark logos	Trademark
Balenciaga	Brand logo, signature designs	Trademark
Versace	Medusa head, baroque print	Trademark
Apple	Apple logo, iPhone, iPad, MacBook images, product renders	Trademark + Design IP
Samsung	Samsung Galaxy, Fold, Note, product likeness	Trademark + Design IP
Nvidia	Nvidia logo, GeForce graphics cards, AI chips	Trademark + Design IP
Sony	PlayStation, DualShock controller, PS logo	Trademark + Design IP
Microsoft	Xbox, Surface, Windows logos, icons	Trademark + Design IP
NFL	Team logos, Super Bowl branding	Trademark
NBA	Logos, player images, teams (e.g., Lakers, Bulls)	Trademark
MLB	Logos, team branding	Trademark
NHL	Logos, team branding	Trademark
FIFA / UEFA	World Cup, Champions League branding	Trademark

Manchester United	Team logo, jerseys	Trademark
FC Barcelona	Crest, Messi-era branding	Trademark
Real Madrid	Team branding	Trademark
Cartier	Love bracelets, watches	Trademark
Hermès	Handbags, wallets	Trademark
Paul Mitchell	Haircare products	Trademark
Redken	Haircare products	Trademark
Levi's	Jeans, jackets, apparel	Trademark
Coach	Handbags, wallets	Trademark
UGG	Boots, footwear	Trademark
The North Face	Jackets, outdoor gear	Trademark
Ralph Lauren	Polo shirts, apparel	Trademark
Dell	Laptops, computers, accessories	Trademark
HP	Laptops, printers, accessories	Trademark
LG	Electronics, appliances	Trademark
Bose	Headphones, speakers	Trademark
Beats by Dre	Headphones, earbuds	Trademark
Canon	Cameras, printers	Trademark
Nikon	Cameras, lenses	Trademark
Rolex	Watches	Trademark
Omega	Watches	Trademark
Ray-Ban	Sunglasses	Trademark
Oakley	Sunglasses	Trademark

Tiffany & Co.	Jewelry, accessories	Trademark
Pandora	Jewelry, charms	Trademark
Michael Kors	Handbags, watches, accessories	Trademark
Calvin Klein	Apparel, underwear, fragrances	Trademark
Tommy Hilfiger	Apparel, accessories	Trademark
Armani	Apparel, accessories	Trademark
Prada	Handbags, apparel	Trademark
Burberry	Apparel, scarves, accessories	Trademark
Moncler	Jackets, outerwear	Trademark
Canada Goose	Jackets, outerwear	Trademark
Columbia	Outdoor gear, apparel	Trademark
Patagonia	Outdoor gear, apparel	Trademark
Under Armour	Athletic apparel, accessories	Trademark
Reebok	Athletic footwear, apparel	Trademark
New Balance	Athletic footwear	Trademark
Asics	Athletic footwear	Trademark
Fila	Athletic footwear, apparel	Trademark
Skechers	Footwear	Trademark
Converse	Footwear	Trademark
Vans	Footwear	Trademark
Crocs	Footwear	Trademark
Dr. Martens	Footwear	Trademark
Timberland	Footwear, apparel	Trademark

Birkenstock	Footwear	Trademark

Comprehensive Table: Not Accepted (IPR/Counterfeit) Businesses & Goods

Subcategory / Risk Type	Not Accepted Examples / Description	Key Indicators / Signals	Notable Brands / IPs (non-exhaustive)	IP Type(s)	Special Notes / Exclusions
1. Primarily Selling Counterfeits	- Sites specializing in replicas/knockoffs of branded physical goods - Imitation products (faux Apple AirPods, "replica" sneakers, fake designer handbags, etc.)	- "replica", "imitation", "fake", "clone", etc. in product description - Price >65% below market value - Low-res images - Website missing legal/about/policy pages or has broken links - Lists unrelated categories together - Spammy or redirect behavior	Nike, Chanel, Gucci, Rolex, Prada, Balenciaga, Coach, Apple, Samsung, Dior, LV, YSL, Cartier, Tiffany, Armani, Fendi, Supreme, Yeezy, etc.	Trademark, Copyright	Not counterfeit: Secondhand/vintage goods, Resellers of legit "hypebeast" limited editions, Refurbished items, Personalization, Repairs
2. Not Focused on Counterfeits (but some infringing)	- Merchants with <50% (or <10) counterfeit items in catalog - E.g., a general store with a small number of suspected fake products	Same indicators as above, but volume and intent lower No store focus on counterfeits	Same as above	Trademark, Copyright	Can be supported if infringing items are removed and/or authorization is demonstrated

3. Circumvention Devices (Rights-Protection Mechanisms)	- Loaded IPTV boxes (with access to pirated content) - RCM loaders, jailbroken or “preloaded” consoles - Mod chips marketed for copyright circumvention - Emulators preloaded with copyright games	- Marketed for bypassing copyright/tech locks - Descriptions tout “free content” or emulation of protected works	Nintendo, PlayStation/Sony, SEGA, Apple TV, Roku, Fire TV, Xfinity, Switch, etc.	Copyright, DMCA	Selling digital-only emulators is ok if no preloaded content; SAAS hosts/storage NOT included in this subcategory
4. Unauthorized Digital Content / Services	- Selling “pirated”, “cracked”, “bootlegged” digital content (software, movies, games, IPTV subs) - Sale of 3rd party software keys (standalone, discounted >65%)	- “Pirated”, “bootlegged”, “cracked”, etc. - Only works on jailbroken devices - Low prices, odd install instructions, website missing legal/‘about’ info, - Redirection or spam	Windows, MS Office, Adobe, films, Spotify, Netflix subs, PSX/XB/Steam codes, UFC, HBO, etc.	Copyright	Does not prohibit games/game keys, digital game mods, or subscription-sharing (e.g., Netflix Profile Sharing Service)
5. IPTV/Online Course/Study Access (Unauthorized)	- IPTV services with unlicensed TV/movies/sports - Sites selling 3rd-party course materials, study guides, textbooks without authorization	- No evidence of authorization for distribution - Catalog includes premium/drm content (e.g., HBO, newly-released films) - Price >65% below normal	HBO, Showtime, Netflix, ESPN, Udemy, Chegg, etc.	Copyright	User must show documentation for at least 3 catalogue items; Original/UGC content sellers are not restricted ; If aimed at students and is not an institution, authorization required

6. Cyberlockers/Remote File Sharing (Public/access/rewards)	- File-sharing/cloud storage sites that: a) reward uploaders financially, or b) allow public file searching/distribution	- Both conditions: Allows upload/download of files Core business is file distribution And rewards uploaders, or files are public/searchable	Mega, 4shared, Uploaded, MediaFire, etc.	Varies: Copyright, possibly others	High risk; Not enabled for Wix; Peer-to-peer sharing not restricted if no public access
7. Unauthorized Merchandise (Logos, Characters, Designs)	- Clothes, toys, accessories etc. with brand, company logos/characters IP used without major alteration - Licensed images, characters, or company branding printed on goods sold not by or via official sources - “Fan art” not transformative enough - Sports jerseys with team logos not via official merchants	- Direct use of brand/entertainment company logos or characters - High volume (250+ items = not “fan art”) - Spelling errors, odd logo variants - Poor quality images	Disney, Marvel, DC, Star Wars, Harry Potter, Pokémon, MLB, NBA, NFL, FIFA, Gucci, Apple, Audi, etc. See full IP/brand list below	Trademark, Copyright	“Fan art” can be accepted if unique, bespoke, or contextually described as fan art Official reseller links, authenticity sections count as positive indicators
Additional: Counterfeit Product Examples	Jewelry, watches, apparel & headwear, footwear, electronics, batteries, software, automotive parts, beauty/cosmetics	- Luxury goods with “prestige” design replicated - Tech accessories “in style of” major brands	Rolex, Omega, LV, Gucci, Supreme, Dior, Nike, Apple, Samsung, Coach, Tiffany, Adidas, YSL, etc.	Trademark, Copyright	—

Crafts, Art & Patterns	- Goods made from unlicensed copyrighted character artwork/design - Finished products from copyrighted patterns - Celeb/movie scene images on goods - “Fan art” if not transformative or high volume	- No copyright/license for IP - No model release for celebrity images - “Fan art” mass-produced	Disney, Barbie, Star Wars, Marvel, Hello Kitty, etc.	Copyright, Trademark	“Fan art” can be supportable if: - Description/context or visual cues indicate it - Limited/bespoke in number - Unlikely to be mistaken for official merch
-----------------------------------	--	---	--	----------------------	--

(and many others—see reference list above)		

Summary/Usage

- Use this table for reference if you’re **reviewing a merchant/user/website for IPR/counterfeit risks on Stripe for a Wix-related business**.
- If you suspect goods or services might fall under a “Not Supportable” category, look for indicators and **compare with the specific descriptions above**.
- Require **evidence of authorization** for IP use if the user could be legitimate (e.g., for IPTV, educational content, branded goods).
- “Fan art” only supportable if **bespoke, limited, and clearly transformative**.

Does this table fit your operational needs, or do you need it in a different format (e.g., spreadsheet or CSV)? If you want a printable or shareable version, please specify!
